

Go Inventory compliments and extends the back office asset management capabilities of AiM by providing real time processing of pick tickets, counter releases, returns, physical counting and management of inventory parts.

Your Challenges

- No automated way to tell customers that parts are ready to be picked up
- Physical counting is a manual laborious process
- Signature handoff is all paper-based and is stored in huge filing cabinets
- The process of requesting, picking, and releasing parts is a manual paper-intensive process
- All bin and part data must be transposed from handwritten notes when updates are needed

What's in it for you?

- Create and edit pick tickets
- Draw items and track what is unavailable
- Generate notifications via Go Purchasing when parts are drawn and available for pickup
- Browse the warehouse for items
- Release items from inventory
- Return items to inventory
- Sign for transactions
- Count and track inventory
- View and edit part profiles.

What You Get

- Go Inventory – Pick
- Go Inventory – Release
- Go Inventory – Return
- Go Inventory – Count
- Go Inventory – Parts

Go Inventory

As part of a broader Integrated Workplace Management System (IWMS), Go Inventory is seamlessly integrated with an extensive range of facilities management tools under a single, unified software platform.

The five pillars of AiM IWMS:

- Real Estate and Property Management
- Space Management
- Operations and Maintenance
- Capital Planning and Project Management
- Energy Management
